

INDUSTRIAL SERVICES LLC

Industrial Cleaning & Specialty Services

Facility managers depend on the AK team to provide critical services that restore the operating efficiency of their manufacturing and process equipment.

Industrial Cleaning

We use water pressure up to 40,000 psi combined with specialty nozzles to efficiently clean and prepare pipes, tanks, vessels, boilers, and process equipment. Our team can remove material buildup, blockages, scaling, debris and more.

Mobile Abrasive Water Jet Cutting

Our portable cutting solutions propel ultra-high-pressure water combined with abrasives to cut materials ranging from concrete to ferrous and non-ferrous metals. Cold cutting technology is safe and cost effective for facilities with flammable atmospheres.

Coating & Membrane Removal

We utilize water to quickly and effectively remove coatings and membranes from concrete, metal and other surfaces at pressures up to 40,000 psi.

Our Expertise, Experience & Equipment Delivers Results

- Ultra-high and high-pressure technology experts since 1992
- Outstanding safety record
- In-house robotic equipment solves complex challenges
- Automated solutions reduce safety risks and downtime
- Dependable and rapid response

Our Clients

- Chemical manufacturing facilities
- Food processing facilities
- Petroleum processing facilities
- Plastics manufacturers
- Power generation facilities
- Recycling facilities
- Water treatment plants
- Other materials manufacturers
